

Cherry Juice For Gout Pain Relief

Many people take cherries and / or **cherry juice** for **gout** pain relief. Here, you'll discover how you can use this natural remedy to relieve the pain of the gout. Cherries and cherry juice can be used to treat gout naturally, without the need for drug-based medications with their horrible side effects. In the 1950s Medical professional. Ludwig Blau was said to have cured his rather serious gout by consuming between 6 and 8 cherries a day.

And since then several studies have shown that consuming cherries can not only reduce inflammation, but, lower **uric acid levels** too. There is a bit of a debate about how much cherries should be taken to help get rid of gout. The number ranges from as little as 6 in order to as many as 40 per day. This is most likely down to just how severe the gout will be, and, each person's metabolism being different.

You Have to Know What Number is Right for You

But some researchers suggest that taking 30 to 40 cherries every 4 hours can help a lot during an actual **gout attack**. With 30 to 40 once a day in order to help prevent attacks. Cherry juice is also regularly used for gout pain relief. Since this is in a more concentrated form this can be pretty effective during an attack and for maintenance.

- But, again, because each person is different, you need to experiment in order to discover how much you need to take to work.
- A minimum of 1 cup of cherry juice (from the health-food store) twice a day, might be a good start for you.
- But if you decide on centred cherry juice, then mix 2 tablespoons in a cup of water and get that two times a day.

Cherries and Cherry Juice for Gout Alleviation is a Very Popular Cure

But, on its own, this remedy is unlikely to prevent further attacks of gout from occurring. This is because there are a number of underlying issues that can determine gout, e.g. the family history of gout or perhaps arthritis, your daily diet, yourself, your weight, medications you may be using, and so on.

This is important because, if you just treat the symptoms of gout attacks, without handling the root causes of gout, you could still suffer these horrible gout pains.
